

First responders *require fast responses*

5G connected laptops for
emergency personnel.

Timing is everything for law enforcement officers, firefighters and emergency medical personnel.

First responders need to stay response-ready, and strong connectivity can help relay the critical data they need to swiftly jump into action and make an impact in their communities.

Enter 5G connected laptops powered by Verizon. Connected laptops provide access to a secure, reliable network in their most crucial moments, helping them serve virtually whenever and wherever duty calls.

Benefits of 5G connected laptops for public safety

Fast response times

5G connected laptops help reduce delays in sending and receiving near-real-time details, including location data and dispatch updates.

Increased productivity

5G connected laptops also help first responders stay connected from a wide range of physical locations, allowing them to efficiently and consistently serve their communities.

Enhanced cybersecurity

Built-in access to 5G means that emergency personnel can bypass risky public Wi-Fi networks, helping them shield sensitive information from prying eyes.

Efficient device management

Simplified connectivity and integrated operating systems help streamline IT management, freeing up first responders to focus on the communities they serve.

Why Verizon?

We partner with leading laptop manufacturers. Additionally, our 5G connected laptops give you access to America's most reliable 5G network.¹ We've also been champions of the public safety community for decades, securing our place as the nation's #1 network choice in public safety.² Verizon Frontline is the advanced network and technology for first responders. We have your back with a team of trusted experts who understand the unique challenges facing first responders – a team that's with you for the long haul. Your mission is our purpose.
